Identity Hackathon Project 2026

Process Sheet

Partner's Name	MD Maruf Khan & Anshuman Singh Rawat
Course / Semester	BCA – 1st Year / Semester 1
College	Dezyne École College
Date	26 October 2026

1. Client's Details

This is the client I made the website for. The details were taken from the client and from the content of the website.

Business name	Garib Nawaz Perfumers
Type of business	Perfume / ittar (attar) shop, family-run
Address	Shop No. 5, Outside Delhi Gate, Ajmer
Phone	9887705691, 9413994103
Opening hours	10 AM – 11 PM
Tagline	"Where Aroma Meets Fragrance"
Products	Red Velvet, Shanaya, Sultan, Musk Thahara, Green Ajmer (also Aseel, Janntul Firdous, White Oudh)
Social media	Instagram, Facebook and YouTube (@garib_nawaz_perfumers)
Main goal of website	Show the perfumes and prices, tell the shop story, and let customers enquire on WhatsApp or visit the shop
Target audience	People of Ajmer and visitors, men and women, mostly using mobile phones

2. Five Questions I Asked and Their Answers

Before starting the design, I asked the client these five questions to understand the need.

No.	Question	Client's Answer
1	What is your business about and what do you want the website to do?	We are a family-run perfume (ittar) shop in Ajmer. We want a website that shows our fragrances, tells people our story and helps customers find the shop and contact us easily.
2	Who are your customers?	Mostly people from Ajmer and visitors who come to the Delhi Gate area, men and women of all ages who like traditional, long-lasting, alcohol-free attars.
3	Which products and prices should be shown?	Red Velvet, Shanaya, Sultan, Musk Thahara and Green Ajmer, with a photo poster, three short points, and prices (6 ml and 12 ml bottles, from about Rs. 100 to Rs. 600). Other names like Aseel, Janntul Firdous and White Oudh can be mentioned in the Product page.
4	How should customers contact or order from you?	Customers should be able to tap a button and send us a WhatsApp enquiry for each perfume, call our two phone numbers, and see our address and map. Shop timings are 10 AM to 11 PM every day. Our Instagram, Facebook and YouTube links should also be on the site.
5	What look and feel do you want?	It should feel rich, royal and traditional, matching our black-and-gold logo, but still clean and easy to read. We want our logo on every page.

What I learned: the client needs a simple 4-page site, a strong WhatsApp/phone call-to-action, and colours that match the black and gold logo.

3. Sitemap

The website has 4 pages. The Home page links to all the other pages. The Products, About and Contact pages have a menu at the top, and every page has the same footer.

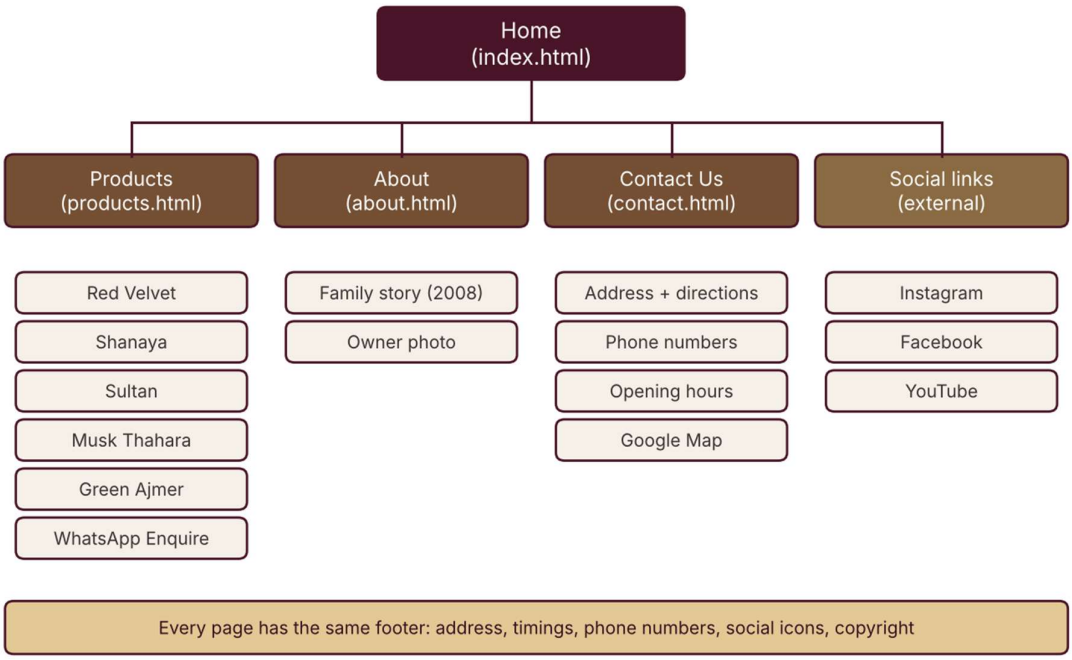

Figure 1: Sitemap of Garib Nawaz Perfumers website

Page	File	What is on it
Home	index.html	Intro video, Shop Now button, 4 featured fragrances, 3 feature boxes
Products	products.html	5 fragrance cards with points, prices and WhatsApp Enquire button
About	about.html	Family story since 2008 and owner photo
Contact Us	contact.html	Address, phone numbers, opening hours and Google Map

4. Hand-drawn Wireframe

I first drew the layout of each page on paper with a pencil. The big boxes with a cross are for images or video.

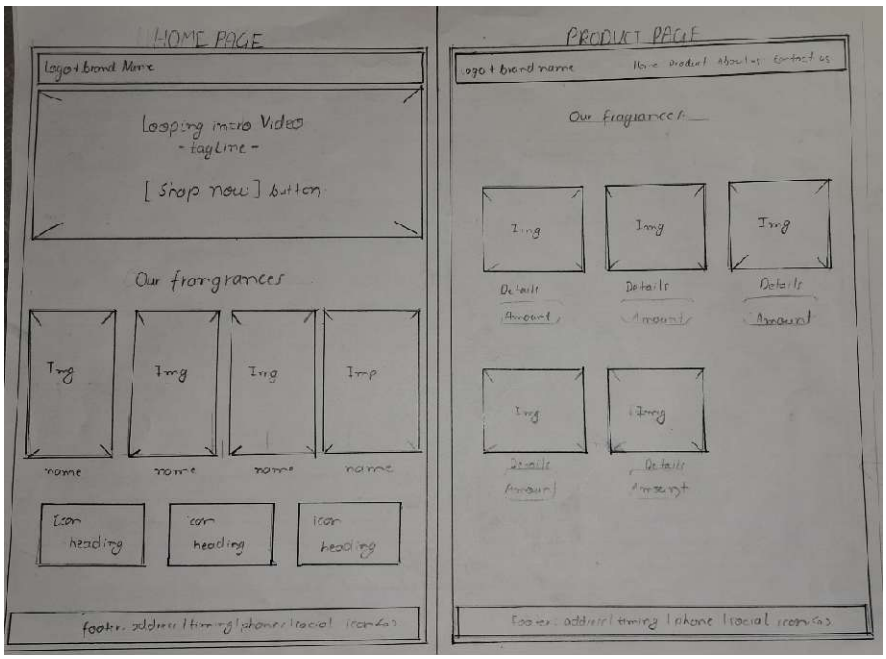

Figure 2: Wireframe of the Home page

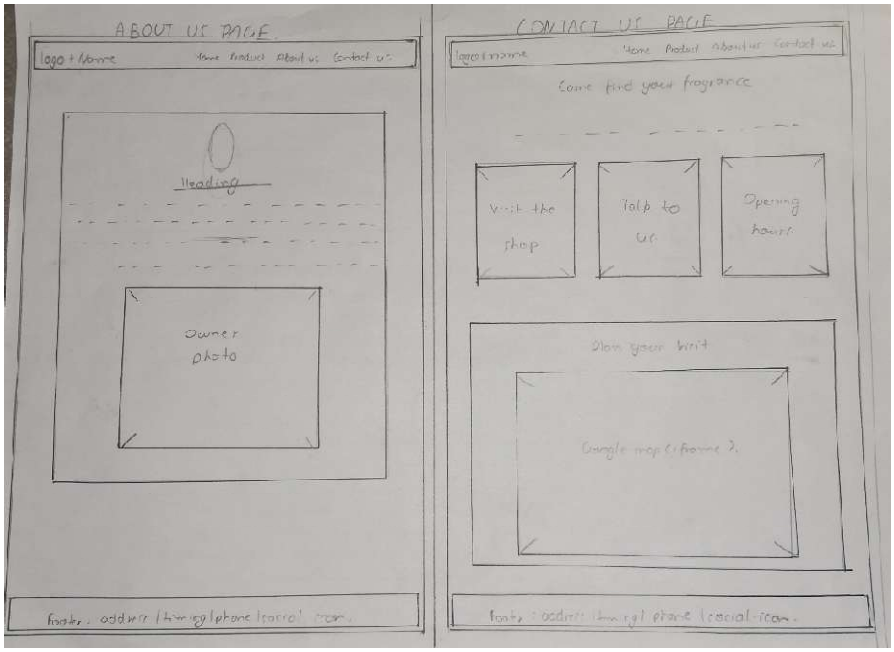

Figure 3: Wireframes of the Products, About and Contact pages

5. Colour and Font Choices

Colours

Colour	Name / Code	Where used	Reason
	Deep maroon #4A1528	Header, footer, buttons	Looks rich and royal like rose and oud perfume. White text on it has a contrast of 14.7:1, so it is easy to read.
	Light gold #E2C995	Brand name, icons, Shop Now button	Matches the gold of the client's logo. It gives a luxury feel. On maroon the contrast is 9.1:1.
	Antique gold #C5A46D	Borders and divider lines	A softer gold, used only for small decoration so the page does not look too heavy.
	Cream #F5F0E8	Page background	Warm, like paper. It is easier on the eyes than pure white and makes the white cards stand out.
	Dark brown-grey #393333	Main text	Softer than pure black but still very readable (10.9:1 on cream).
	Grey #726967	Small descriptions	Used for less important text. Contrast on white is 5.3:1, which passes the 4.5:1 rule.
	Brown #755034	Button hover colour	Gives clear feedback when the user moves the mouse over a button.

Fonts

Font	Used for	Reason
Georgia (serif)	Main headings, product names, card titles	A serif font looks elegant and traditional, which suits a perfume brand and goes well with the gold logo lettering.
Arial (sans-serif)	Body text, menu, buttons	Very clear on all screens and phones, and installed on almost every device, so the page loads fast without extra font files.

I used only two font families so the website looks neat and the pages load quickly.

6. W3C HTML Validator

I checked all four HTML pages (index, products, about, contact) with the W3C Markup Validator.

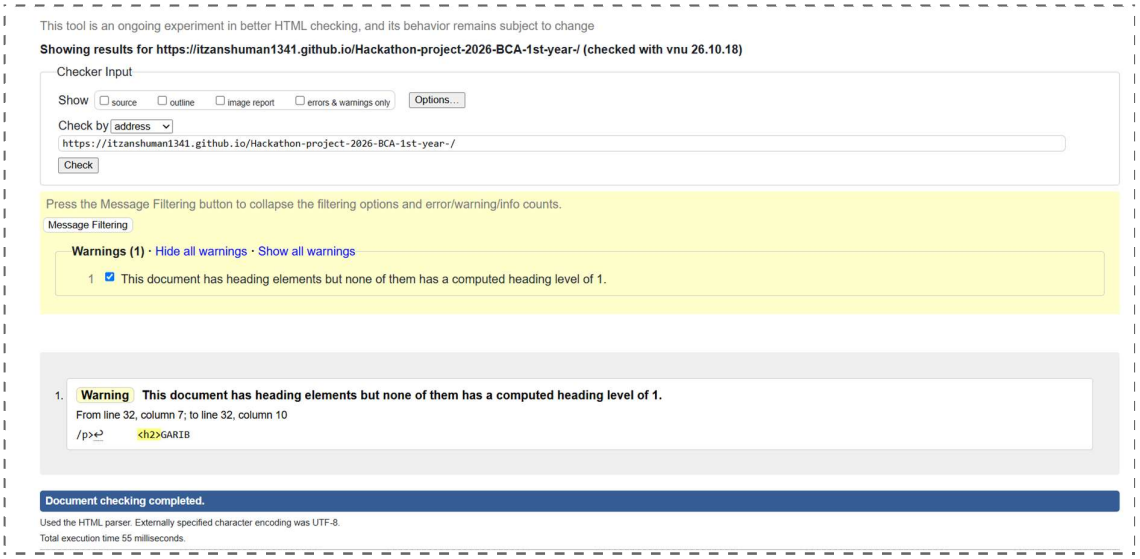

Figure 4: W3C validator result

7. AI Use Declaration

Every entry must include this table. List every AI tool you used. Honest, detailed declarations are respected; hidden use is not.

AI tool	What I asked it to do	What I wrote, changed or checked myself
Claude	Explain how CSS Grid and repeat columns work for the product and category cards	Wrote the card layouts in style.css myself and tested them on mobile and desktop
Claude	Suggest ideas for CSS animations (floating circles, fade-up, icon pulse) and explain @keyframes	Wrote and adjusted the timings and delays myself and checked they run smoothly on every page
Claude	Help me fix a few HTML and CSS bugs (alignment, spacing, hover effects)	Found the problems myself, applied the fixes by hand and re-tested all 4 pages
Claude	Check my product descriptions and page text for spelling and grammar	Chose the final wording myself and checked the product names, address and contact details

Declaration: I/We confirm that this entry is our own work, that every AI tool used is listed above, and that I/we can explain every part of the submitted code.

Name(s): Md Maruf Khan & Anshuman Singh Rawat **Date:** 27 October 2026

8. Google Lighthouse Report

I ran Lighthouse in Chrome (DevTools → Lighthouse) on the website for both Mobile and Desktop.

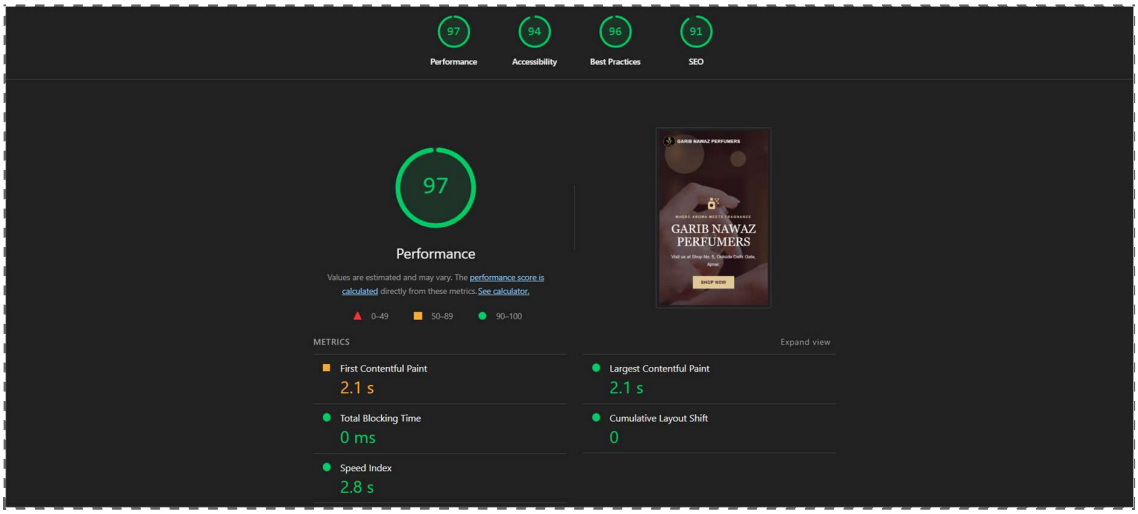

Figure 6: Lighthouse scores (Mobile)

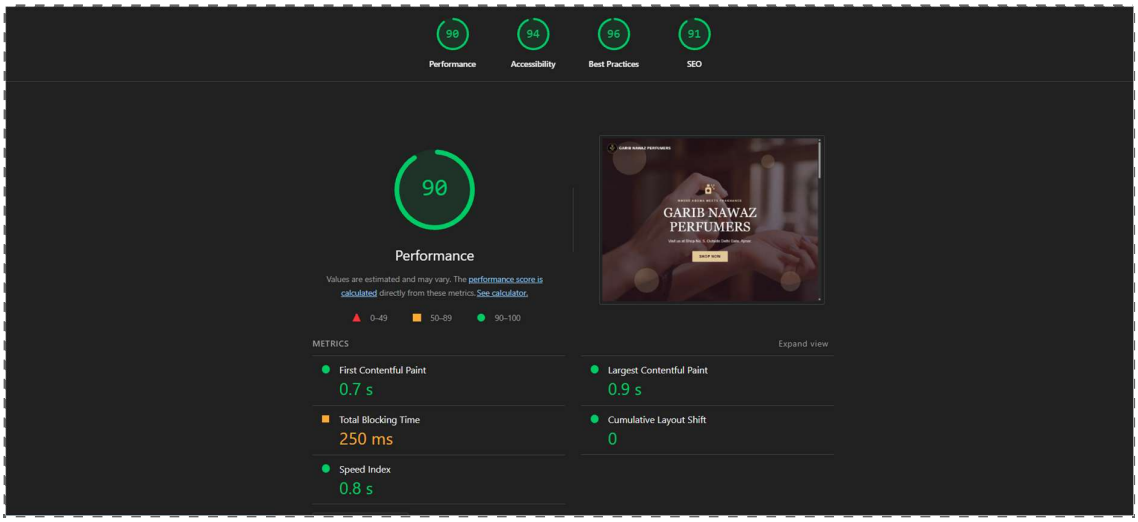

Figure 7: Lighthouse scores (Desktop)

Category	Mobile score	Desktop score
Performance	97	90
Accessibility	94	94
Best Practices	96	96
SEO	91	91
